Learning Curve™

This handbook contains instructions specific to the Learning Curve™ cartridge.
For complete instructions refer to the Cricut™ user manual included with your machine
or visit www.cricut.com

The characters on the Learning Curve™ cartridge were designed by:

Heather Lancaster.

Growing up I somehow missed out on going to kindergarten and I have been doing my best to make up for it ever since! I have a passion for the basic kindergarten curriculum, including cutting, glueing, drawing, and collecting paper of any kind! I have done my best to advance at least some of my artwork from off of my mother's fridge and into my countless family scrapbooks, and an assortment of Sizzix®, paper and sticker products produced by Provo Craft. I hope that some of my ideas can inspire you on your own personal journey of creativity!

Heather lives in Calgary, Alberta, Canada, with her husband and their six children, who have all attended kindergarten and who all happily support Heather's creative efforts!

What Is Real Dial Size?

All characters are measured from the lowest possible point to the highest. In Learning Curve™, all Base characters are created at the same height. The layers and shadows are sized proportionately to fit the base characters. If Real Dial Size is selected, all characters will be cut according to the selected dial size.

Real Dial Size ON

What Are Creative Feature Keys?

The top three pairs of keys on the left panel are reserved for the Creative Feature effects of each set. These Features vary with each specific cartridge, providing greater versatility and thousands of options!

The Creative Feature keys included on the Learning Curve™ cartridge are **Puzzle**, **Tile**, **Train Car**, **Bookmark**, **Shadow**, and **Shadow Blackout**.

To use a Creative Feature key, just select it prior to pressing the CUT button. The characters displayed on the screen will then be cut in the style of the selected Creative Feature. Due to their sizes and shapes, a Feature may not work with all shapes. Please refer to the Icon Gallery for Creative Feature details.

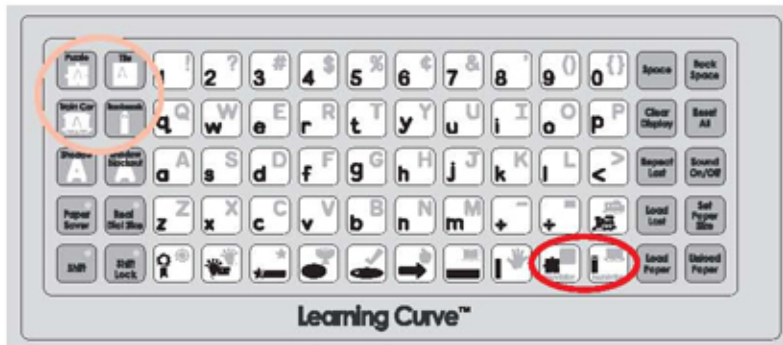

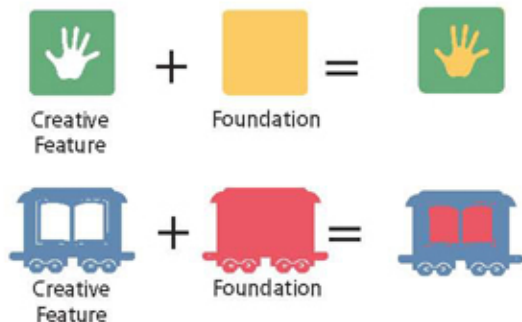

TIP: A Feature can be selected before or after a character has been selected, but before the CUT button is pressed. Once pressed, a Feature key will remain lit until it is turned off in one of the following ways: the Feature key is pressed a second time or the Reset All key is pressed.

What Is a Foundation Key?

The Learning Curve™ cartridge contains two Foundation keys with two characters on each key.

Foundation shapes are the solid version of images that were used as Creative Features. These can be used alone or with layers created using the Creative Feature keys.

In the Icon Gallery, you will find a diagram for every character on your cartridge. The color change indicates that the image on the upper right is created using the **Shift** key and the image on the lower left is created without **Shift**. Using the Icon Gallery, you can see at a glance which Creative Features are available to use with the character that you have selected. **You will find that some characters are very detailed and cut better at a larger dial size.**
