D. Sharing your projects

Cricut Design Space™ allows you to share your projects with friends and family.

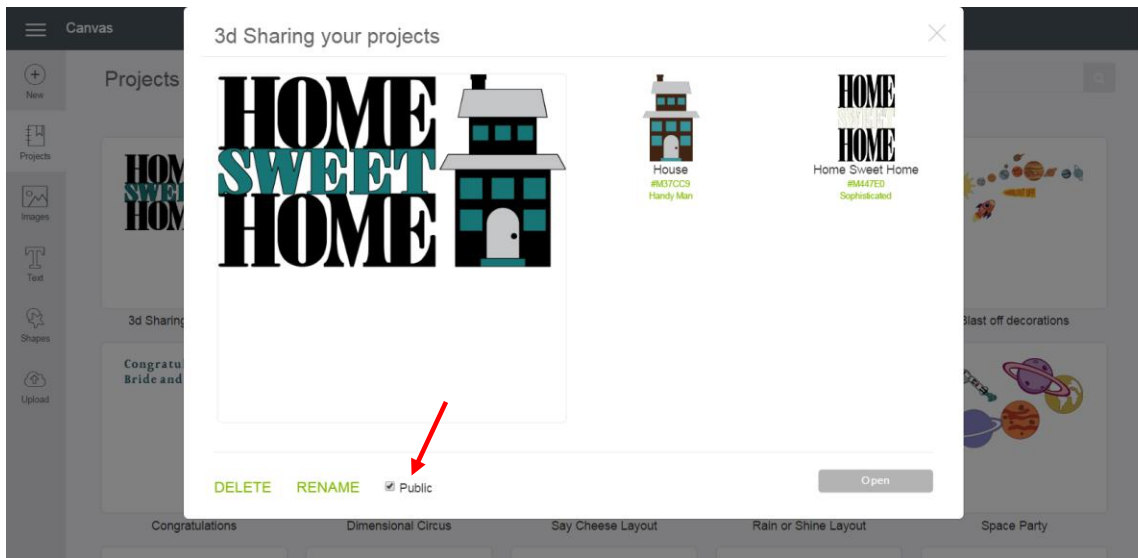

Step 1 To share a project, make sure the project has been saved, and then open the project on the Canvas.

Step 2 You will want to be sure your project is saved as public. To respect the intellectual property rights of others, projects containing Cut What You Want™ uploaded images and images that are no longer purchasable cannot be shared. You can see if your project is shareable by clicking *My Projects* from the Canvas.

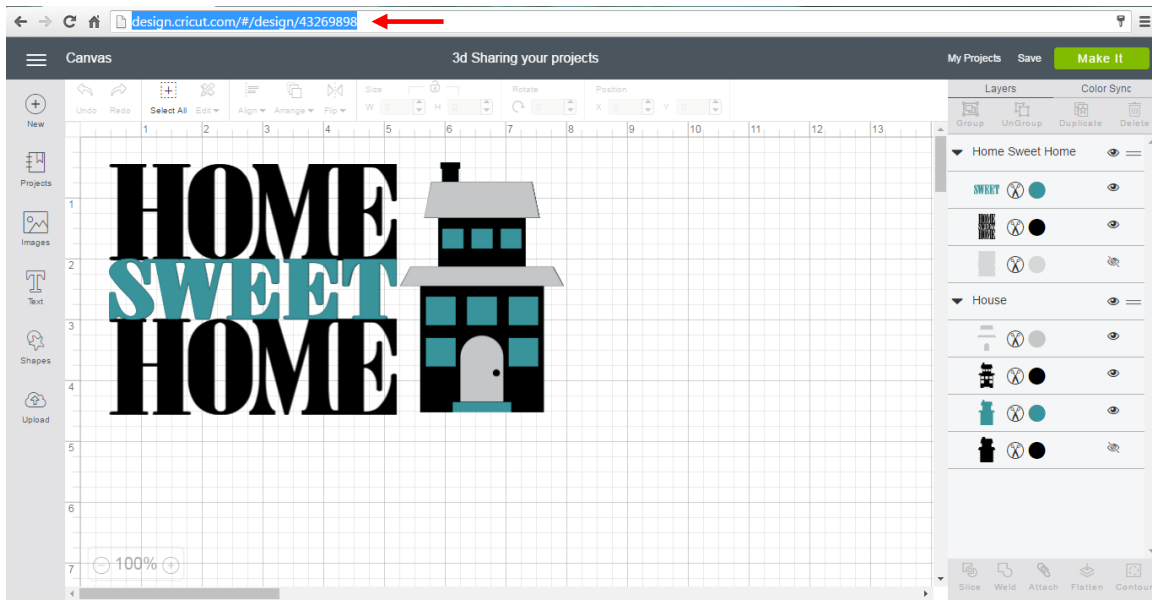

Click the Project Tile of the project you would like to share to view the project details. A project is sharable if you see a checkmark next to *Public*. If it is unchecked, you can only access your project from this account.

Tip If you would like to restrict access to your projects, unclick the box under *Public*.

Step 3 Return to the Canvas. Click in the address bar of your browser to select (highlight) the project’s web address (URL). Copy the URL with the keyboard shortcut “Ctrl-C” for PC users or “Command-C” for Mac users.

Step 4 Once you’ve copied the URL, you can paste it using the keyboard shortcut “Ctrl-V” for PC users or “Command-V” for Mac users. Share the project with family and friends by pasting the URL in an email or your favorite social media site.
