

7. Inserting images from the Cricut® Image Library

D. Searching with filters

Use filters to narrow your image search results by Ownership, Type, or Layers.

Step 1 To narrow image choices with filters, begin by clicking the Images Tab in the Design Panel on the left of the Canvas to access the Image Library.

Step 2 A new window opens so you can view the Image Library.

Step 3 Click on the Filter Menu on the top right to show the filter options.

Step 4 Select the type of filter you would like to apply to the images on your screen: Ownership, Type, or Layers.

Ownership filters images based on your level of access.

- My Images – Includes images that are free, uploaded, linked, purchased, and part of Cricut Access™ membership.
- Uploaded – Includes images you have uploaded to Cricut Design Space™.
- Free – Includes images that can be used without a purchase.
- Cricut Access – Includes images you can use as a Cricut Access member.
- Purchased – Includes cartridges that have been linked to your machine, as well as images or digital cartridges you have purchased.

Type filters images based on the image style.

- 3D Objects – Includes images that are folded or pieced together to create boxes, flowers, cupcake liners, etc.
- Backgrounds & Textures – Includes images that have a decorative design or pattern that fills the majority of the image.
- Borders – Includes images that work as an ornamental strip or design around the edge of an image.
- Cards & Envelopes – Includes images that are folded to create a personalized greeting card or envelope.
- Frames – Includes images with a decorative border and an open or solid center.
- Phrases – Includes image designs that form decorative sentiments.
- Printables – Includes images that will print on your home printer and then be cut out with your Cricut machine.

Layers will filter images based on the number of materials you need.

- Single Layer – Includes images that require only one material to create.
- Multi-Layer – Includes images that require more than one material to create.

Step 5 Repeat the process to apply additional filters. You can apply as many filters as you like. In the example below, we applied an additional filter, the Type filter “Frames.”

Step 6 The filter options are listed at the top of the screen. You can dismiss any of the filters by unchecking the box. In the example below, we dismissed the Multi-Layer filter.

Step 7 Click on an Image Tile to add it to your image tray or search for another image. (See Section 7C for example.)

Cricut Design Space (PC/Mac) User Manual

Step 8 Once images are selected, click the Insert Images button to add them to the design screen. (See Section 7C for example.)

Step 9 You can now move and size images to visualize how they'll look on your project. (See Section 7C for example.)
