

11. Inserting Basic Shapes

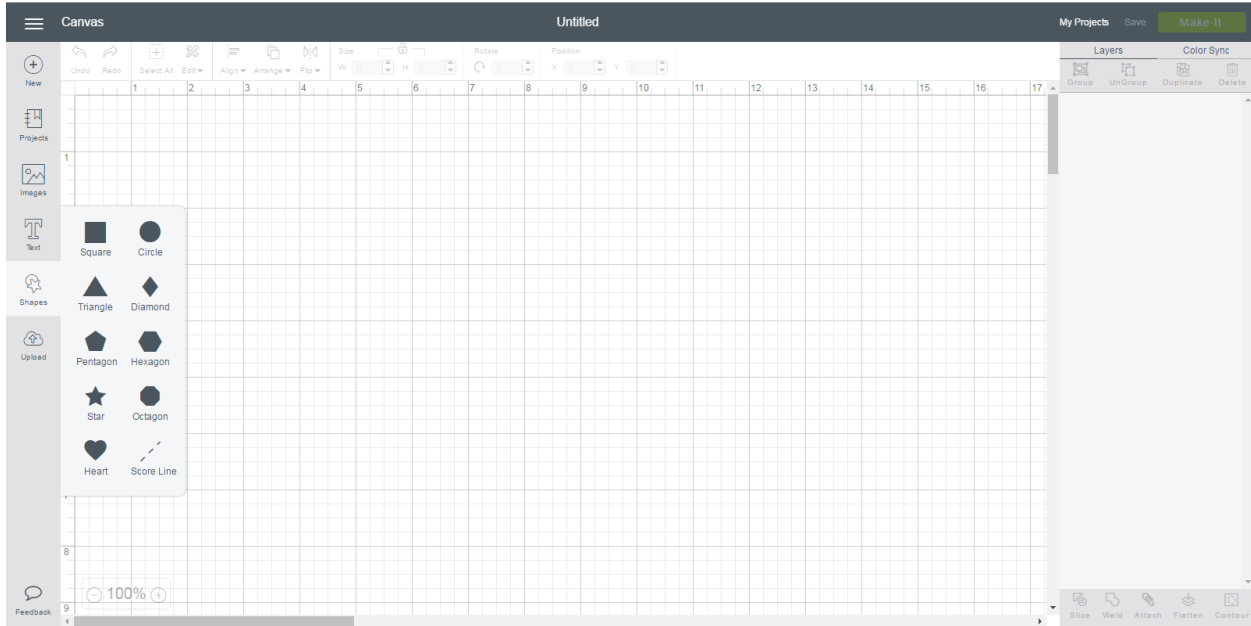

A. Inserting basic shapes

Insert Shapes allows you to quickly and easily add a variety of basic shapes to your project.

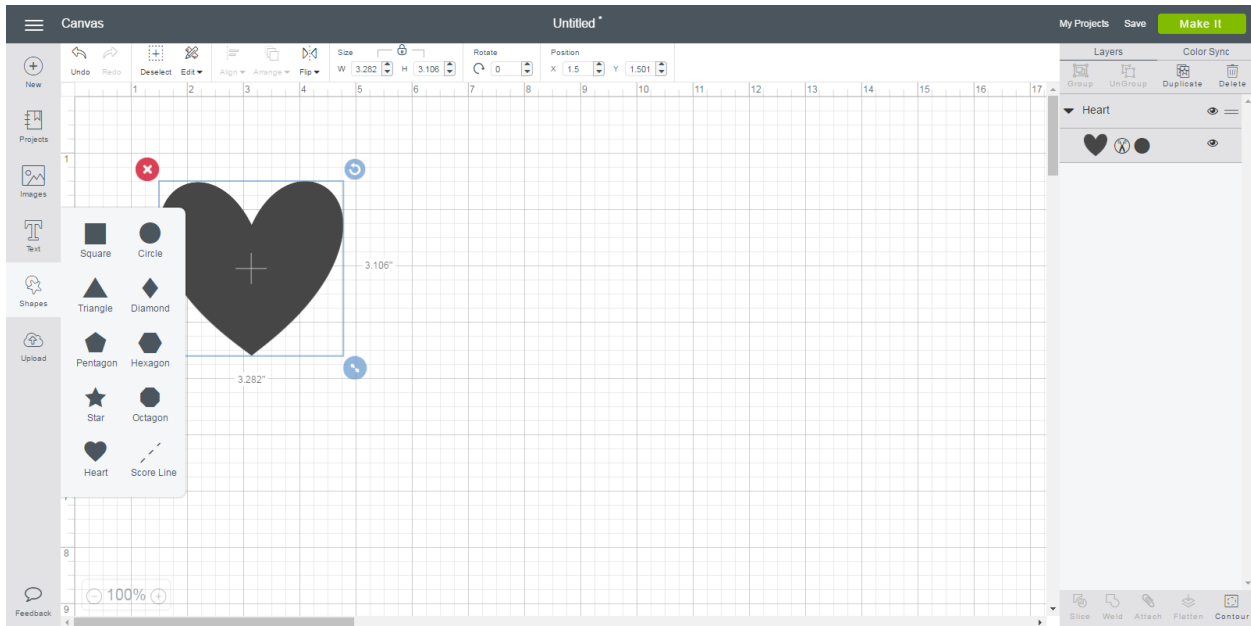

Step 1 Click *Shapes* from the left menu of the design screen.

This will open a menu of basic shapes.

Step 2 Click on a shape from the menu to instantly add it to the design screen. The shape will now appear in the Layers Panel as a single layer image.

Tip You can edit the shape just as you would any other image.

Step 3 Once shapes have been added to the design screen, close the menu by clicking anywhere on the design screen or by re-clicking *Insert Shapes*.
