

Project canvases

Placing a project canvas on the design canvas allows you to better visualize your final project. The project canvas is only a representation. It does not cut; instead it acts as a guide to help you see how the finished project will appear. Project canvases can only be selected in Cricut Design Space™ on your PC or Mac®. For details, see the “Project canvases” section of the user manual for Cricut Design Space™ for PC and Mac®.

Tip: If you created a project in Cricut Design Space™ for PC or Mac® and inserted a project canvas, the project canvas will be visible in Cricut Design Space™ for iOS® devices (iPad®, iPhone® and iPod Touch®); however, you will not be able to alter the project canvas.
