

Gestures

Images inserted on the iOS® device (iPad®, iPhone® and iPod Touch®) design screen respond to standard finger gestures to help manage them more naturally. There are gestures for:

- selecting a visible image (tap, swipe)
- selecting an image that's behind another image or partially covered by another image (tap, touch and hold)
- selecting multiple visible images (swipe, touch and hold then tap)
- selecting multiple images that are behind another image or partially covered by another image (tap, touch and hold)
- moving selected image (drag)
- panning or scrolling the design canvas (two-fingered swipe)
- zooming in to or out of the canvas (pinch)
- zooming in to or out of the canvas show all images in the project (double tap)
